

CM Series

Used in photovoltaic, environmental protection, mineral processing, mechanical packaging, Solvent extraction and other industries

- Simple appearance, key operation, 4-digit LED display flow or speed is more intuitive
- Can automatically save the control parameters when the last power failure
- Support RS485MODBUS communication protocol, analog control, foot switch control
- Perform flow calibration based on target value and actual value to ensure transmission accuracy
- Features a convenient full speed button for quickly filling or emptying the tube
- Various pump heads such as YZ series, DG series and TX series can be installed

Max Flow: 2280mL/min

Max speed : 600rpm

Test conditions:

- 1.Flow data testing environment for room temperature 20-25 °C, relative humidity is not more than 80%, altitude is not more than 1500 meters.
- 2.The test is measured using a straight-through tube, suction range of 0.5 meters, the head is not more than 0.5 meters, the total length of the tube is not more than 1.5 meters (inlet end + outlet end + test end).

The above data test environment for normal temperature and pressure, the test fluid is water, the data is for reference only, please prevail in practice.
